NEW VISTAS HEALTHCARE LTD

New Vistas is one of the leading companies to help people cope with the stresses of modern living, maintain optimum health and treat conditions many of which result from the environmental conditions of the 20th Century.

We live today in a world surrounded by many different forms of toxic waste matter, from gross to subtle forms of poison. These effect the quality of water, soil, air and the food chain, in short the entire eco-system which supports our planet. Evolving technology has brought enormous benefits to mankind, but at a price and its influence on the human body, mind and spirit are now being recognised and explored in many branches of the empirical sciences. These substances and influences on the organism must be countered by lifestyle, diet, nutrition and the development of appropriate treatment protocols. There is increasing evidence that there are links between these poisons and the risk or possibility of developing serious illness. Changes take the form of

symptoms which are difficult to categorise but which alter normal gland or organ functions. Symptoms may not present themselves as significant pathological changes in tissue status until they have become gross i.e. metastasised in body chemistry.

The 20th Century approach to the control of disease has been drug therapy, commonly referred to as conventional medicine. Without doubt mankind has benefited. However, the down side has also been felt in the side effects that result. The drugs frequently suppress and repress the cause of the problem for a short period only, merely changing the effect. Allergic reaction, food sensitivities, immune disorders, post viral syndrome, fungal disorders, chronic fatigue, depression, low energy levels to name but a few are amongst the everyday problems summarised under the heading **the chronically ill**.

Does the prevalence of chronic illness result from the degraded environment, the dependence on processed foods or the level of drug intake? The answer is probably a combination of all three!

GUIDELINES

HOMOEOPATHIC REMEDIES

- Liquescentes -

60ml - also available in 125ml,

125ml - also available in 250ml.

- ◆ Liquescentes may be taken with / after meals either alone or with juice.
- ◆ Liquescentes and other homoeopathics should be taken 20 minutes apart.
- ◆ Liquescentes may generally be taken at the same time with other recommended Liquescentes except for Fatty Acid Liquescentes and Thyroid Liquescentes which should be taken separately.
- ◆ Refrigerate once opened.

HOMOEOPATHICS - GENERAL

*H*omoeopathic remedies are designed to work as complementary and supportive to standard medical therapies. They are not meant as a replacement. If symptoms persist, consult a medical doctor. If pregnant or lactating consult your doctor.

*I*f conditions persist and the patient is not responding properly to the homoeopathic program, we encourage the

Practitioner to make other referrals so that the condition will not deteriorate. Allopathic medicine has some dramatic benefits that can help with different disease structures in their crisis stages.

Proving: This is a symptom caused by a homoeopathic, usually mild in appearance. If the homoeopathic is terminated and symptoms abate in 24 hours, it could be a proving. If symptoms continue after 24 hours, then it is unlikely they were caused by the homoeopathic. When symptoms grow in intensity or for prolonged length of time it is an indication of a more serious problem - consult your doctor!

The 20th Century and particularly the latter half has been a period of unparalleled advance in science and technology. One result has been an ever increasing level of exposure to toxic compounds. These chemically based toxins are polluting the environment and are increasingly hazardous in varying degrees to our human body.

The **Xenobiotic Remedies** address the ill effects of a specific host of these toxins and apply the law of homoeopathic neutralisation thus providing practical antidotes. The range of products include antidotes to the ill effects of asbestos, chemicals, beauty products, industrial solvents, environmental toxins, waste materials, various metals including mercury amalgams and many more.

The higher potencies are combined with lower potencies thus ensuring a “deeper” result to the chronic level of toxicity, the miasm level as well as the acute or predisposed level. The **Xenobiotic Remedies** bring homoeopathy to a new level of effectiveness! The remedies stimulate the vital force within the body to detoxify and cleanse itself. They reduce or eliminate the ill effects on the immune and lymphatic systems with secondary effects varying to the specific aim of each individual product.

The **Xenobiotic Remedies** are safe to use. They are effective and produce rapid results. Care is required in prescribing, particularly in cases of severe and chronic illness. In such cases layered detox is recommended. Organ support, in conjunction with or prior to detox will help with aggravation and avoid a healing crises. Organ support is critically important in cases of severe and multiple toxic conditions and should be supported with the **New Vistas Liquescentes**, which are designed to compliment the **Xenobiotics**.

Complex Homoeopathy i.e. the art of combining ingredients and potencies is the most popular type of homoeopathy used in the world today. It is this branch of science that has created the renaissance in homoeopathic prescribing in the new millennium. Combination ingredients are chosen based on a symptomatic picture and the combinations are engineered to give a broad-based range of effectiveness. They contrast with singular homoeopathic remedies which usually have smaller realms of utilisation. Thus, combination homoeopathy offers the doctor, patient and consumer a wider range of utility and choice. In nature everything exists in a combination form and the law of synergy is based on the principle that the sum of the whole is greater than the sum of the parts.

The Combination Remedies have been developed following careful sourcing and blending of the ingredients so as to maximise the synergistic effect. Complementary herbs are chosen and careful attention is paid to avoid a combination with antidoting ingredients. The resulting effect is the equivalent to a new singular formula.

The New Vistas' Combination Remedies are safe and effective, will minimise healing crises and help reduce the risk to the patient. The extensive range has a wide range of utility for use by professionals in chronic conditions and they can equally be used for acute conditions and for self care.

*E*xcess body toxins or toxic overload in individual organs leads to malabsorption which results in under-nourishment. Chronic illness is the outcome and as organs malfunction, the ultimate result is disease. Organs need restoration and strengthening and weakened organs in particular need special care. To address this problem the micronutrient was developed - **The Liquescence**. The **Liquescences** are potentised remedies designed specifically to treat organs that have been stressed as a result of toxicity and that have been weakened due to poor nutrition. In this condition organs are unable to absorb or utilise the nutrients from foods, from vitamins, minerals or herbs in their original or gross form. Administering specialised supplements to such organs is wasteful.

*T*he **Liquescences** will help rebuild and strengthen the organ, enabling it to function as nature intended. This is an ideal therapy for the treatment of stressed organs prior to and during the detoxification process. **Liquescences** come in liquid form to maximise effectiveness as the greater surface area will help trigger the digestive system for greater absorption. These remedies are safe for people of all ages including children. They are particularly suitable for the elderly and those in ill health.

*I*n addition to their function to restore health to stressed organs, the **Liquescences** are ideal tonics for use on an ongoing basis so as to maintain optimum health and vitality. They can be used in combination with each other or with other homoeopathics or conventional medications.

The combination of homoeopathic science with nutritional balancing techniques to produce potentised micro-nutrients has now developed into a fine art over a period of two decades. **Schuessler** developed the concept of the **Cell Salts** in potentised form, as a means of treating and preventing disease.

The **Systems and Mineral Liquescence** range focuses on the practical utilisation of

homoeopathy in the form of nutritional deficiencies and imbalances. The naturopathic community has long recognised homoeopathy as one of the strongest forces in healing as well being gentle and safe. Whilst nutritional science was largely ignored for a long period, recent efforts have given it much deserved credibility, as it has so much to offer not only in the **prevention** of disease, but in the **treatment** as well. **Liquescences** combine these two powerful modalities, **Homoeopathy** and **Nutrition** to maximise the patient's healing response and help to prevent further complications and the onset of disease.

Sarcodes Therapy has been used for many years as a means of rebuilding tissue when organ structures are in a diseased state. Damage to organs caused by toxicity, toxic overload and malnutrition can result in malfunctioning of the organ with knock on effects on general health and the onset of disease.

Sarcodal Homoeopathy offers the safest and most gentle form of **Sarcodal Therapy**. The **New Vistas'** glandular homoeopathics are engineered in homocords of differing potencies. Maximum efficiency is achieved with a combination of 6x, 12x, 30x, 60x, 100x. This allows the body to respond to the frequency of dilution which works best to rebuild tissues. The restorative remedies are safe and effective, undergoing stringent quality controls. All glandular materials are of either American or New Zealand origin where they are organically produced.

The **Emotionals Remedies** are a continuation of the “Combination Range” designed to help stabilise psychological conditions common today. They should be used in conjunction with Xenobiotic therapy where such is diagnosed as essential.

Any type of psychological disorder should be referred to a professional trained in this area. These remedies are an adjunctive therapy and should not be used as a primary or singular method of treatment. They can however be very effective in conditions such as anxiety, stress, depression etc. and can reduce or perhaps eliminate dependence on drug therapy for people suffering from such conditions.

KIDDIES RANGE REMEDIES

New Vistas offer a special **Kiddies Range** which focuses on acute and chronic conditions that occur and reoccur regularly. Homoeopathy is particularly suited to children. It promotes growth and development in a variety of ways and can be used for all ages from shortly after birth.

How can Homoeopathy help children?

From a few weeks after birth, immune development remedies can be given which will help with the development of the immune system and thereby help the overall growth of the child. To prevent infections very effective remedies are available and these can be administered by means of a drop under the tongue or the drops can be made directly on the navel.

Colic and wind is one of the common complaints among children. Give the infant the colic drops as it arises or add 2 drops to the bottle in the evening. For babies that have allergic tendencies, there will be a frequent build-up with mucous and this can easily be relieved with the appropriate homoeopathic remedy. All in all children will benefit from ongoing use of homoeopathy, thereby minimizing the ingestion of chemical based medications.

*T*he will to live is a law of nature. Nature is a survivor and responds to challenges in its environment. In responding to current challenges it is researching traditional supports and systems. **Traditional Medicines** are regaining their status in the consciousness of the public. We must find new protocols and redefine the meaning of health in a world where change is the only given! **Homoeotherapy** is one branch of traditional medicine developed from the original science of homoeopathy by Dr. Samuel Hahnemann in the 18th century.

The discovery by Hahnemann, that serial dilution of a substance combined with succussion reduces or eliminates the toxic content of that substance, whilst it enhances its energetic power, was revolutionary. He applied it to and proved it with the conditions of his time. Today we expand it to meet the conditions of our time in the form of **Combination Homoeopathy**, the art of combining different source materials at different potencies so as to treat specific clinical conditions. It now forms a key element in the wider science of **Bio-energetic Medicine**, a new branch of medical science evolving and developing to meet the challenges of today.

There are many indications, including clinically based medical protocols utilising natural therapies and natural

medicine, which indicate that this approach to healthcare is a force for the future. It unites the modern world and the ancient world, it facilitates technology whilst it reveres nature. It's a marriage that heralds back to the intuitive spiritual wisdom of the medieval alchemists and unites it with the empirical science of our modern era.

Phytotherapy is the term given to medicines derived from botanical sources. Nature provides a rich and diverse range of life forms sufficient to provide the planet with its needs in the form of food and nourishment. Today's needs cause people to reflect on nature's bounty and how it can be utilised for the common good.

New Vistas is exactly what our name suggests. A new vista and a new vision, leading new thinking about health in a changing world! **New Vistas** products are designed with a philosophy as well as a technology, acknowledging the practical challenges facing the masses of people wanting to remain healthy through preventative measures. Our programme for the **chronically ill** incorporates the essential phases in the restoration of balance, **Xenobiotics** for detoxification of foreign chemicals, **Liquescences** to support and nourish stressed or damaged organs, **Sarcodes** to rebuild damaged tissue and **Treatment Remedies** to stimulate the body's own healing power, draining and pushing those toxins from the body. Our programme continues to provide health maintenance and health enhancing products in the form of **Combination Remedies, Herbal Tinctures, Herbal Essences** and **Specialised Supplements** containing the minerals, vitamins and other ingredients essential to support body function.

New Vistas has been at the forefront in research, innovation and product development. Our production facilities and quality control procedures are amongst the best in the world. Customers can be assured of products that are safe, reliable and consistent. We support that product range with a back-up and advisory service. We provide an on-going teaching programme which will enable the practitioner to provide a unique health service to their patients and clients.

New Vistas is, in partnership with **The Practitioner**, helping to restore balance to a world increasingly out of balance.

NEW VISTAS ALLERSODES

*M*ore and more people are suffering from allergies in an ever allergic world. The need for an effective and safe method of treatment has resulted in *New Vistas* developing a special desensitising programme with a large range of **Allersodes** including inhalant and food allersodes. **Allersodes** are homocord remedies which contain a range of potencies of the offending allergen.

*I*n treating allergies we can use small amounts of allergy causing material to help reverse the anti-body cascade and other allergic factors within the body. This type of desensitisation can be used with oral antigens. When the immune system is compromised, microscopic doses of an allergen will build up specific cell responses and the system can then be induced to trigger its own antibodies and block further adverse reactions. The response will gradually neutralise the allergic reaction and active immunity will then be obtained.
